

# More light from Palram Multiwall Polycarbonate system

*On this great tragedy of Covid-19 contagion, small things can matter a lot. Like light and stress reduction can be bit help. We bring to your notice the innovative ways we can address a same step but can giant help.*

- **SUNPAL** is an advanced multiwall polycarbonate panel system for a variety of flat or curved roofing and cladding designs.
- It enables architects to incorporate natural light, thermal insulation, and structural strength into skylights, facades, and roof designs.
- Engineered to be lightweight and leak-proof, withstand very high loads, and accommodate thermal expansion and contraction

## Comparison between Polycarbonate and Glass

*We can use this product for Social Distancing*
